### Course Description:

The Managing Across the Lifecycle Certificate is the final module of the Service Lifecycle and/or Service Capability Intermediate courses that leads to the ITIL Expert in IT Service Management recognition. This 5-day course immerses learners in the contents of the ITIL V3 publications; focusing on business, management and supervisory objectives, purpose, processes, functions and activities, and on the interfaces and interactions between the processes covered in the Service Lifecycle. This course is designed using an engaging scenario-based approach to learning the core disciplines of the ITIL best practice and positions the student to successfully complete the associated exam.

### Audience:

The Managing Across the Lifecycle course will be of interest to:

- Individuals who require a business and management level understanding of the ITIL V3 core Lifecycle and how it may be implemented to enhance the quality of IT service provision within an organization
- Individuals seeking the ITIL Expert certification in IT Service Management for which this qualification is the final mandatory module leading to the Expert certification
- Individuals seeking progress towards the ITIL Master in IT Service Management for which the ITIL Expert is a prerequisite
- A typical role includes (but is not restricted to): CIOs, Senior IT Managers, IT Managers and Supervisors, IT professionals and IT Operation practitioners.

### Learning Objectives:

At the end of this course, the learner will gain competencies in:

- Introduction to IT Service Management business and managerial issues
- Managing the planning and implementation of IT Service Management
- Management of strategic change
- Risk management
- Understanding organizational challenges
- Service assessment
- Understanding complementary industry guidance

### Course Organizational Logistics:
